- **Backend:** Python Django, REST APIs
- **Database:** MySQL, Azure Cosmos DB
- **Tools:** Git, GitHub, Jenkins, AWS, Azure Service Bus, Jira

Basic Knowledge:

- Flutter & Dart (UI & navigation basics)
 - CI/CD Pipelines
-

Projects

ZEMO WORKS

Zemo Works is a full-stack task management system for team collaboration, project organization, and productivity tracking with real-time monitoring, role-based workspaces, interval time tracking, and reporting for performance insights.

🌐 [Live Site](#)

Tech Stack: MySQL, React, Python, DRF

- Manages tasks and subtasks with structured project organization
- Implements role-based workspace access for teams and users
- Provides real-time task progress tracking and updates
- Includes interval-based time tracking for user activity monitoring

HRMS ZEMO WORKS

A full-stack HR management platform that streamlines employee records, attendance, leave management, payroll, and departmental workflows. Includes role-based authentication (Admin/Manager/Employee), real-time data handling, and reporting features to improve HR efficiency and organizational productivity.

 [Live Site](#)

Tech Stack: MySQL, React, Python, DRF

- Manages employee records, attendance, leave requests, and payroll in a centralized system
- Implements role-based authentication for Admin, Manager, and Employee access levels
- Provides real-time data updates and dynamic reporting dashboards
- Automates HR workflows to reduce manual effort and improve efficiency
- Secure backend APIs built with Django REST Framework for scalable architecture

Education

Baha Uddin Zakariya University
BS Information Technology

Multan, Punjab, Pakistan
October 2021- June 2025

Languages

- English (Fluent)
- Urdu (Native)

Interests

- Full-Stack Web Development
 - Exploring SaaS Product Ideas
 - Animation in UI/UX
 - Learning through Real Projects
