

MUHAMMAD TALAL QADIR

Django Backend Developer | Python Full-Stack Engineer

Lahore, Pakistan | qadirmuhammadtalal@gmail.com | +92-336-1303071 | LinkedIn: [Muhammad Talal Qadir](#) | GitHub: [Talal-Qadir](#)
| Portfolio: [Talal-Qadir](#)

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with hands-on experience building scalable RESTful APIs using Django and Django REST Framework, integrated with React.js front ends. Skilled in database design (MySQL, PostgreSQL, Azure Cosmos DB), JWT/session-based authentication, and cloud infrastructure on Azure and AWS, with added exposure to AI/ML model testing, validation, and dashboard development.

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart (basic)

Backend & APIs: Django, Django REST Framework (DRF), REST API Design, Celery, JWT Authentication, Session-Based Authentication, Redis, Facebook/Meta Graph API Integration, OAuth 2.0

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, API Integration

Databases: MySQL, PostgreSQL, Azure Cosmos DB

AI & Machine Learning: AI/ML Model Testing & Validation, Model Performance Monitoring, AI-Based Dashboard Development, Model Reliability & System Checks

Cloud & DevOps: AWS, Microsoft Azure, Azure Service Bus, Git, GitHub, Jenkins, CI/CD Pipelines, Jira

Other / Familiar: Flutter & Dart (UI & navigation basics), Agile/Scrum practices, Software Development Lifecycle (SDLC), Problem Solving

PROFESSIONAL EXPERIENCE

Python Developer | Zemotify – Lahore, Pakistan

March 2026 – September 2026

- Developed and maintained backend services using Django and Django REST Framework, powering RESTful APIs for production web applications.
- Designed relational database schemas and optimized queries to improve data handling efficiency and application response time.
- Implemented JWT and session-based authentication and authorization mechanisms, strengthening application security across user roles.
- Built and integrated React.js UI components with backend APIs, contributing to frontend feature delivery alongside the core backend role.
- Collaborated cross-functionally with frontend developers to ensure seamless integration between client and server layers.
- Debugged and optimized application performance, improving reliability and scalability of backend services.
- Set up asynchronous task processing using Celery and Redis to handle background jobs and improve application responsiveness.

Technical Support Intern | Systems Limited – Lahore, Pakistan

October 2025 – March 2026

- Assisted in developing and testing an AI-based monitoring dashboard, supporting AI/ML model validation, performance tracking, and system reliability checks.
- Partnered with the Automation and Problem Management team to automate recurring operational tasks, reducing manual effort.
- Monitored production platforms using logs, alerts, and dashboards to proactively identify and flag system issues, including AI model behavior anomalies.
- Collaborated with Development and DevOps teams to resolve bugs, performance issues, and infrastructure incidents on Azure.
- Managed and resolved support tickets within SLA targets, ensuring consistent service quality.
- Resolved stuck-file errors across Azure Server and Storage environments and escalated unresolved issues to L2/L3 teams.

EDUCATION

BS, Information Technology

Baha Uddin Zakariya University — Multan, Punjab, Pakistan | October 2021 – June 2025
